Student Support Cell

World Hepatitis day

Hepatitis B Vaccination for students

(JULY 28-AUGUST 1 2023)

Hepatitis B is a potentially life-threatening liver infection caused by the hepatitis B virus (HBV). It is a major global health problem. Hepatitis B vaccine is recommended in certain high-risk groups like medical students and healthcare workers. It is a safe and effective vaccine that offers 98% to 100% protection against hepatitis B. Hence Student support cell in association with NSS, AIMS unit had arranged vaccination for MBBS students from July 28th 2023 to August 1st 2023.

The main objective of the session was to vaccinate the under-graduates as they are susceptible to HBV infection during exposure to clinical cases & different procedure. The students were addressed about the Hepatitis B Infection and the importance of being vaccinated against the same.

A total of 250 students from the Phase 1 of MBBS participated in the event and received the vaccination throughout the 3 days the camp was conducted on.

The programme was organised under the guidance of Dr Shivaramu MG, Principal, AIMS. Special thanks to Chief of the hospital, Medical and nursing superintendent, AIMS for smoothly organising the event.
